The Growing Need for RPA and SAP Security

Market Statistics

- By 2025, 85% of large enterprises will have deployed some form of RPA. *(source: Gartner)*
- The global RPA market is expected to reach \$13 billion by 2030, growing at a CAGR of 32.8% from 2022. *(source: Grand View Research)*
- SAP systems are used by 92% of Forbes Global 2000 companies, making them a prime target for cyber threats.

Security Challenges

- Increase in cyber-attacks targeting RPA as they access critical business processes.
- SAP systems often hold sensitive and critical business data, making them a valuable target for cybercriminals.

Our Security Solutions for RPA

Key Features

Real-time monitoring and anomaly detection.

Role-based access control and secure credential management.

Use of standard tools and platforms for RPA security such as UiPath Orchestrator, CyberArk and Splunk.

Integration with existing enterprise security systems through API to enhance security without disrupting existing workflows.

Benefits

Protects against both external threats and internal vulnerabilities.

Ensures compliance with regulatory requirements.

Minimal impact on system performance.

Our Security Solutions for SAP

Key Features

Advanced threat detection using AI and machine learning.

Encryption of data at rest and in transit.

Automated security audits and compliance checks.

Use of standard tools and platforms such as SAP GRC, SAP Identity Management, and Microsoft Azure Sentinel.

Integration through SAP Certified Add-Ons.

Using Batoi's expertise to create custom solutions or extensions for enhanced security.

Benefits

Comprehensive protection of critical SAP modules & data.

Enhances system stability and reliability.

Supports secure digital transformation initiatives.

Implementation Process

Consultation

Initial discovery session to understand the client's current security infrastructure, challenges, and specific needs.

Outcome

A customized security assessment report outlining vulnerabilities and recommended actions.

Customization

Based on the consultation, Batoi's team designs a tailored security solution utilizing the appropriate tools and technologies that align with the client's RPA and SAP environments.

Outcome

A detailed implementation plan that addresses each identified security gap.

Deployment

The Batoi team works closely with the client's IT department to deploy the security solutions, ensuring minimal disruption to existing operations

Outcome

A seamless integration of advanced security measures into the client's systems.

Ongoing Support: 24/7 support and regular updates to tackle emerging threats.
