

Batoi Is Now SOC 2 Certified

Bhubaneswar, India – December 01, 2022—Batoi, a leading software development automation company, is delighted to announce it is now certified for SOC 2 following the American Institute of Certified Public Accountants (AICPA) standards for the Suitability of the Design and Operating Effectiveness of Controls. This critical milestone demonstrates Batoi's dedication and commitment to safeguarding its customers' data.

Importance of Information Security

Since sensitive data is one of an organization's most valuable assets, it makes sense to prioritize its security.

Information security is the activity of guarding against unauthorized access to, use of, disclosure, interruption, alteration, inspection, recording, or destruction of sensitive information. An organization must implement information security to safeguard its technology and information assets.

What is SOC 2 Compliance

SOC 2 is a third-party external audit developed by the AICPA that specifies how businesses should manage and safeguard customer data. The AICPA has developed rigorous Trust Services Criteria around five core principles that are the foundation for the standard: security, availability, processing integrity, confidentiality, and privacy.

Batoi is Now SOC 2 Compliant

Being SOC 2 compliant has been a strategic priority for us. Batoi's SOC 2 compliance was validated by auditing by TUV SUD. The audit process included a thorough review of our company policies and processes regarding how we safeguard our customers' and partners' data and how these controls operate.

Key Advantages of SOC 2 Compliance to Our Customers and Partners

- **Assurance of Data Security:** SOC 2 certification is an industry-recognized standard. It demonstrates that we have robust data security measures to protect and safeguard our partners' and customers' data.
- **Continuous Compliance:** This certification is not a one-time event. SOC 2 requires a detailed audit over a period of time that provides assurance that our company is continuously maintaining high data security standards.
- **Risk Mitigation:** With this certification, our customers and partners can be confident that we take a proactive approach to identifying and mitigating potential risks and

threats to data security.

- **Compliance Validation:** This certification is conducted by an independent third-party auditor, which ensures that our security measures have been thoroughly evaluated and validated, thereby providing additional peace of mind to our customers and partners.

In addition to SOC 2, [Batoi has already been certified compliant with the British Standard Institution \(BSI\) 's ISO 27001:2013 standards for information security management.](#)

About Batoi

Batoi is a software development automation company. The Batoi RAD Platform revolutionizes software engineering by automating development, deployment, telemetry, and workflow management processes. Our comprehensive managed services, enhanced by AI, cover application development, DevSecOps, VAPT, cloud cost optimization, scaling, migration, and security compliance.
