Batoi Achieves PCI Compliance

Bhubaneswar, India – July 20, 2017 — Batoi, a leading software development automation company, is proud to announce its successful attainment of Payment Card Industry (PCI) compliance. This achievement confirms that Batoi has met the highest security standards to accept, store, transmit, and process payment card information, ensuring robust protection against fraud, theft, and data breaches.

What Is PCI Compliance?

Launched on September 7, 2006, and administered by the PCI Security Standards Council (PCI SSC), PCI compliance refers to adherence to the Payment Card Industry Data Security Standard (PCI DSS). These standards ensure that all companies that process, store, or transmit card information maintain a secure environment.

The Importance of PCI Compliance

Maintaining PCI compliance is crucial for protecting sensitive payment card information from breaches. Non-compliance can result in severe legal and financial consequences, including hefty fines and penalties from payment card companies. Additionally, it can damage an organization's reputation, leading to a loss of trust from customers and partners. Compliance demonstrates a company's commitment to safeguarding sensitive payment card information building trust and credibility.

Commenting on this significant achievement, Mr. Ashwini Rath, CEO of Batoi, said, "Achieving PCI accreditation demonstrates our dedication to maintaining the highest level of data security and our commitment to continuously enhancing our information security practices. Our customers and partners can have full confidence in our ability to protect their sensitive information."

About Batoi

Batoi is a software development automation company. The Batoi RAD Platform revolutionizes software engineering by automating development, deployment, telemetry, and workflow management processes.
