The Challenge of Managing Patient Data and Healthcare Operations

Healthcare providers struggle with fragmented systems for patient data, appointments, billing, and compliance.

Over 65% of healthcare organizations report inefficiencies due to unintegrated systems.

Increasing regulatory demands make secure patient data management a top priority for 90% of healthcare providers.

Introducing Batoi Pulse

1

A cloud-based EHR platform designed to simplify patient management, health records, and operations.

2

Seamlessly integrate patient data, appointments, billing, and telemedicine from a single platform.

3

Ideal for healthcare providers, clinics, hospitals, and medical centers of all sizes.

The screenshot displays the Batoi Pulse interface for a patient named Manny Jah. The interface includes a navigation bar with the Batoi logo and 'Pulse' text. Below the navigation bar, there are tabs for 'Members' and 'Manny Jah...'. A secondary navigation bar contains buttons for 'Billing', 'Message', 'Appointment', and 'Download Personal Data'. The main content area is divided into several sections:

- Patient Profile:** Features a profile picture, name 'Manny Jah', and contact information (email, phone, and date of birth: Feb 10, 1999).
- ABHA and Payment Dues:** Shows 'ABHA 201 661' and 'Payment Dues INR 12,900.00'.
- Services (1):** A table with columns 'Title', 'Categories', and 'Date'. It lists one service: 'Health' under 'SOAP Notes' on 'Sep 9, 2024'.
- Clinical Documentation (1):** A table with columns 'Title', 'Categories', and 'Date'. It lists one entry: 'Elective Surgery' with '1' in the 'Categories' column and 'Sep 12, 2024' in the 'Date' column.
