Cloud and Infrastructure Management by Batoi

Secure, Scalable, and Optimized Cloud Solutions for Your Business

batoi.com/managed/cloud

Industry Statistics

Discover key cloud adoption trends and performance metrics to understand the growing demand for optimized cloud infrastructure.

92% of businesses have adopted cloud infrastructure, and **78%** report that automating cloud management leads to cost savings and operational efficiencies.
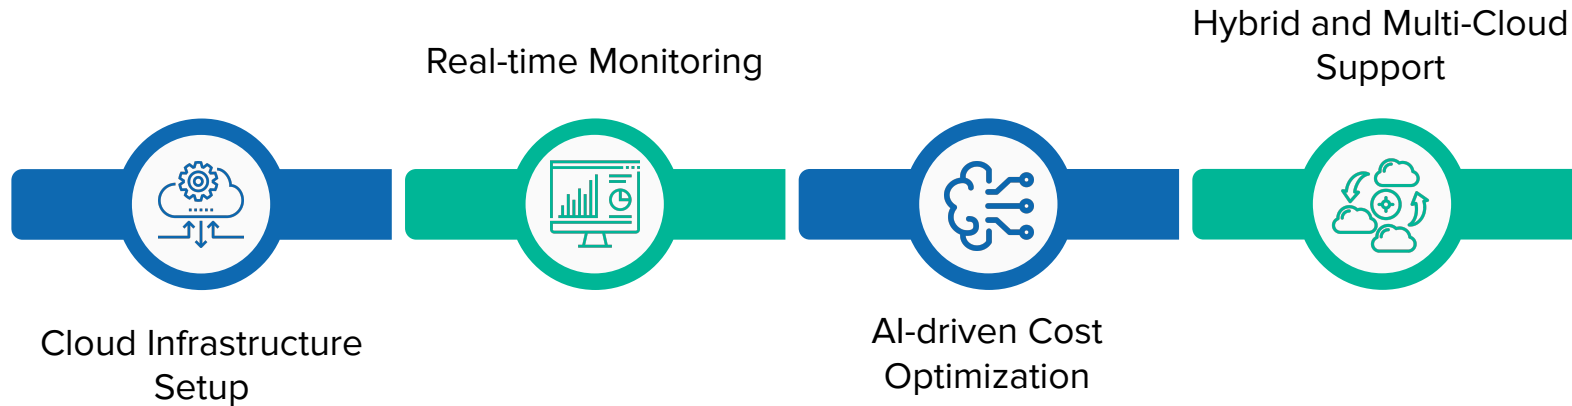

Cloud security breaches now outnumber on-premises breaches, underscoring the importance of continuous monitoring and real-time security assessments.

Batoi's **Cloud and Infrastructure Management** services offer a comprehensive suite to ensure your cloud operations run efficiently and cost-effectively. Our solutions cover everything from cloud migration and performance monitoring to AI-driven analytics while controlling costs.
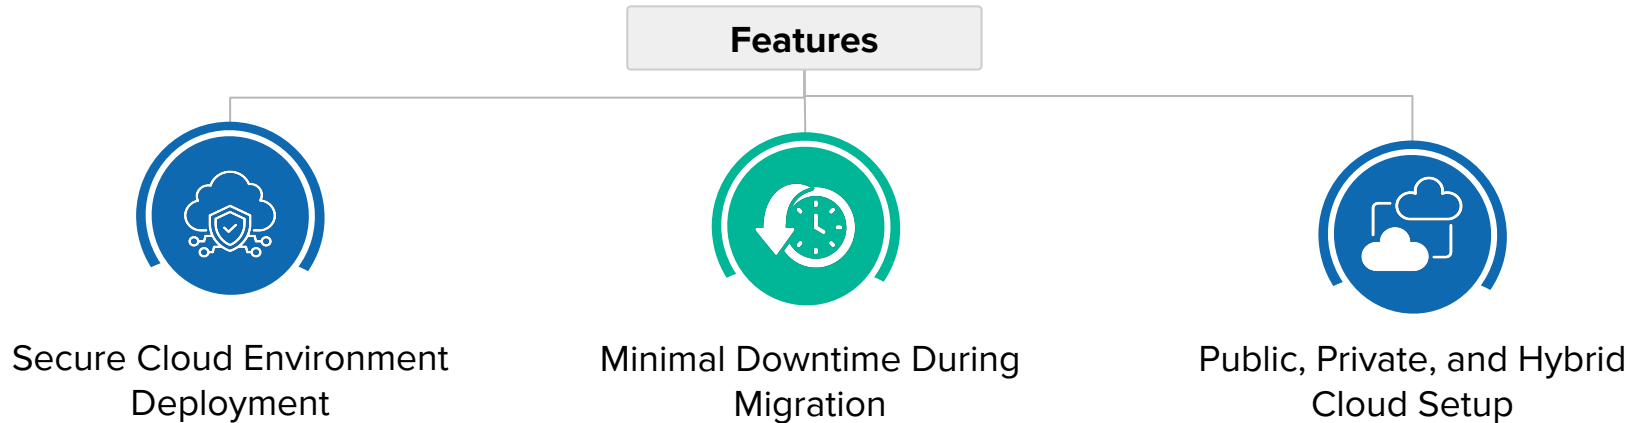

BATOI®

Transform Your Business with Optimized Cloud Solutions

Batoi's Cloud and Infrastructure Management services are designed to help businesses scale, secure, and optimize their digital infrastructure. Whether you are migrating to the cloud, managing multi-cloud environments, or optimizing performance, we provide comprehensive cloud solutions.

Real-time Monitoring

Hybrid and Multi-Cloud Support

Cloud Infrastructure Setup

AI-driven Cost Optimization
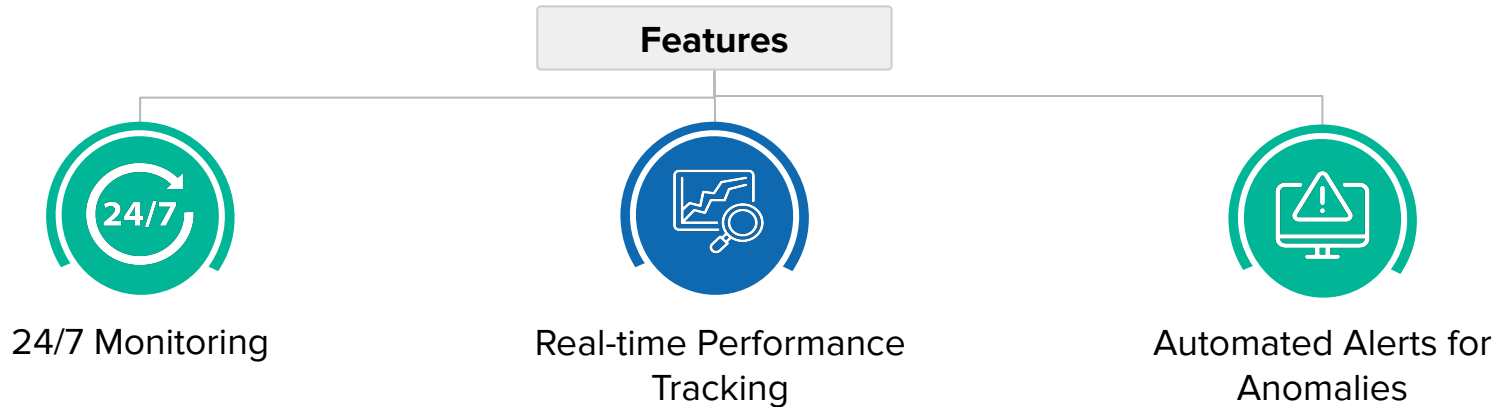

BATOI®

Cloud Infrastructure Setup and Migration

We guide your business through the complexities of cloud migration and setup, ensuring minimal disruption and maximum efficiency. Whether you're moving from on-premises to the cloud or optimizing existing cloud infrastructure, our experts provide a seamless transition.

Features

Secure Cloud Environment Deployment

Minimal Downtime During Migration

Public, Private, and Hybrid Cloud Setup

Benefit: Fast, secure, and reliable cloud migration.

BAT*I*®

Real-Time Monitoring with Batoi Insight

Batoi Insight enables businesses to track their cloud infrastructure's performance, security, and uptime. With real-time alerts and continuous monitoring, you can respond to potential issues before they escalate.

Features

24/7 Monitoring

Real-time Performance Tracking

Automated Alerts for Anomalies

Benefit: Proactive monitoring ensures system reliability and security.

AI-Driven Cost Optimization

Cloud management is not just about uptime—it's about ensuring cost efficiency. With **Batoi Insight**, businesses can analyze usage patterns, identify cost-saving opportunities, and optimize resource allocation using AI-driven insights.

Features

Automated Resource Optimization

AI-Driven Cost Analysis

Actionable Recommendations

Benefit: Reduced operational costs and improved resource efficiency.

Hybrid and Multi-Cloud Support

Whether operating in a hybrid cloud or multi-cloud environment, Batoi ensures seamless integration and management. We help you orchestrate resources across various platforms to improve scalability, security, and performance.

Features

Integrated Management for Multiple Cloud Providers

Secure Data Transfer Across Environments

Optimized Performance Across Clouds

Benefit: Improved flexibility and scalability in cloud operations.

Why Choose Batoi for Cloud Management?

Automated, AI-powered cloud management for businesses looking to improve performance, security, and scalability.

|	
End-to-End Cloud Solutions	From migration to optimization, we handle every aspect of your cloud infrastructure.
Cost Efficiency	Save on cloud expenses with tailored FinOps strategies.
Data-Driven Insights	Unlock AI-driven analytics and big data insights with **Batoi Insight** to enhance your business performance.
24/7 Monitoring and Security	Ensure your cloud assets are secure with round-the-clock monitoring using **Batoi Insight**.

BATOI®

Industries We Serve

Batoi serves many industries, providing cloud solutions that meet specific regulatory and operational requirements.

Healthcare

Cloud environments that comply with HIPAA and ensure secure data management.

Retail and E-commerce

Optimized performance for high-traffic digital platforms.

Finance

PCI-DSS compliant cloud infrastructure with real-time risk management.

Government and Public Sector

Secure, scalable cloud environments that handle large data sets.
